SURVEYING AEGEAN THRACE IN THE DIGITAL ERA ***ΕΠΙΦΑΝΕΙΑΚΕΣ ΕΡΕΥΝΕΣ ΣΤΗΝ ΑΙΓΑΙΑΚΗ ΘΡΑΚΗ*** ***ΣΤΗΝ ΨΗΦΙΑΚΗ ΕΠΟΧΗ***

Aegean Thrace has long been the focus of archaeological investigations, producing an exciting array of new sites, monuments, and artifacts from prehistory through the Byzantine period. During recent decades, this archaeologically rich area has attracted the interest of multidisciplinary research to explore the landscape and its surroundings with a combination of new methods, including intensive pedestrian survey, satellite and aerial remote sensing, geophysical prospection, as well as extensive use of GIS spatial analysis, custom-made field applications, and other digital tools.

Aiming to bring together researchers investigating Aegean Thrace to discuss best practices and results of new or legacy campaigns, the members of the HFRI-funded project **Archaeological and Geophysical Research on the Peraia of Samothrace** (Αρχαιολογικές και γεωφυσικές έρευνες στην περαιά της Σαμοθράκης*) invite you to a workshop entitled:
